## Resumen

Acá debe ir el resumen del artículo. Por ahora, agregué algunas referencias de prueba, y configuré el documento para que las referencias sean APA7, esté en español, y los presente como autores en un formato mejor. También hice que todas los links estén en azul, y todas las referencias cruzadas (links a secciones dentro del artículo) estén en rojo. Todo lo podemos cambiar.

## 0.1. R Markdown

This is an R Markdown document. Markdown is a simple formatting syntax for authoring HTML, PDF, and MS Word documents. For more details on using R Markdown see <http://rmarkdown.rstudio.com>.

When you click the **Knit** button a document will be generated that includes both content as well as the output of any embedded R code chunks within the document. You can embed an R code chunk like this:

```
summary(cars)
```

```
##      speed      dist
## Min.   : 4.0    Min.   :  2.00
## 1st Qu.:12.0    1st Qu.: 26.00
## Median :15.0    Median : 36.00
## Mean   :15.4    Mean    : 42.98
## 3rd Qu.:19.0    3rd Qu.: 56.00
## Max.   :25.0    Max.    :120.00
```

## 0.2. Including Plots

You can also embed plots, for example:

Note that the `echo = FALSE` parameter was added to the code chunk to prevent printing of the R code that generated the plot (Leongómez et al., 2020, 2017, 2014; Leongómez, Havlíček, et al., 2021; Leongómez, Pisanski, et al., 2021).
